CONTENTS

CONTENTS
Masaki Kawamoto: L^2 -properties for linearized KdV equation around small solutions
Genki Koda: Representation of the norm of ideals by quadratic forms with congruence
conditions
Kengo Fujisawa and Kouji Tahata: Asymmetry model based on f-divergence and orthogonal decomposition o symmetry for square contingency tables with ordinal categories 39
Jay Prakash Singh and Kingbawl Lalnunsiami: Certain curvature properties of $N(k)$ -quasi Einstein manifolds 55
